EDUCATION

University of Michigan

Bachelor of Science in Honors Mathematics, Computer Science, Statistics

- **GPA:** 3.78/4.00

Ann Arbor, MI

Aug. 2022 – May 2025

University of Wisconsin-Madison

Bachelor of Science in Mathematics, Computer Science

- **GPA:** 3.89/4.00

Madison, WI

Sep. 2021 – May 2022

Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Web Systems, *Machine Learning, Computer Organization, Computer Vision, *Numerical Linear Algebra, Real & Complex Analysis, *Probability Theory, *Stochastic Processes, *Linear Regression, *Mathematical Statistics, *Deep Learning for Bioinformatics
* **Indicates Graduate Coursework**

EXPERIENCE

Software Engineer Intern

Math Works

May 2023 – Aug. 2023

Greater Boston, MA

- Developed and deployed a parser in C++ for time data strings, interfacing with MATLAB to support the parsing of previously unsupported time formats for MATLAB duration objects, resulting in increased customer usability
- Leveraged ISO Unicode and globalization libraries in C++ to achieve comprehensive language support, enabling parsing of data strings in over 250 languages
- Created project spec and employed design patterns to ensure integration and modularity with existing duration parsing format
- Participated in agile sprint cycles involving daily stand-up sessions and one-on-one meetings

Club President

UW-Madison Math Club

Oct. 2021 – May 2022

Madison, WI

- Organized Undergraduate Math Colloquia, reaching out to Professors, PhD students, and Masters students
- Collaborated with other student organizations and academic departments to host cross-disciplinary events
- Presented a comprehensive funding proposal, resulting in successful acquisition of funds for club activities

PROJECTS

StockXGuess | *React.js, Spring Boot, PostgreSQL, Bootstrap*

- Developed an interactive web-based game using the React.js framework, where the player guesses the price of ten random sneakers from popular brands on StockX and receives a score
- Created a RESTful API in Spring Boot to read and update sneaker and user data from a PostgreSQL database
- Deployed the application online by utilizing proxy tunneling with a local machine

Options Pricing and Trading Tool | *Python, Numpy, SciPy, Requests, BeautifulSoup*

- Developed a program in Python to find the theoretical price of an options contract using the Black-Scholes model
- Utilized BeautifulSoup to scrape real-time risk free rates and historical volatility by parsing website html
- Used the TD Ameritrade API to display real-time Bid/Ask and last trade price data

Discord Bot | *Python, Discord.py, Requests, Flask*

- Developed a Discord Bot using Python to detect and display ghost ping messages
- Utilized the Discord.py API to parse deleted messages for user pings, displaying the deleted message if a user ping was detected
- Hosted the bot with Replit, and used Flask with UptimeRobot to maintain continuous runtime

TECHNICAL SKILLS

Languages: C, C++, Java, JavaScript, Python, SQL (PostGres, SQLite), R, MATLAB, HTML/CSS, L^AT_EX

Frameworks/Libraries: React.js, Node.js, Express.js, Spring Boot, Flask, Jinja2, Bootstrap, NumPy, pandas, Matplotlib, seaborn, Scikit-Learn, PyTorch, SciPy, Requests, BeautifulSoup, Selenium

Developer Tools: Git/Github, Unix/Linux, Visual Studio, VS Code, IntelliJ, Perforce, Eclipse, Jira, Confluence
